## ABOUT ME

I am a fifth-semester Systems Engineering student with experience in personal and academic projects focused on web development and algorithm optimization. I am proficient in technologies such as HTML, CSS, JavaScript, C++, and Java, combining problem-solving with clean and functional design.

I have strong interpersonal skills, including effective communication and adaptability, allowing me to collaborate efficiently in team environments. I am eager to gain my first professional experience, apply and expand my knowledge, contribute to innovative projects, and grow as a developer.

## HOBBIES

In my free time, I enjoy being in nature and participating in outdoor activities. I also have a strong passion for music, whether it's discovering new artists or listening to my favorite tracks. Additionally, I like playing video games and football, both as a way to relax and to stay active.
